# CANDIDATE WORKFLOW AI-BASED REMOTE PROCTORING SOLUTION

Pg. 1 [Company Confidential- Pearson VUE] Version 2.1\_280322

## PLEASE CLICK ON ONE OF THE BELOW LINKS FOR INSTALLATION OF ES SECURE BROWSER AT YOUR RESPECTIVE SYSTEM.

1. INSTALLATION STEPS FOR WINDOWS BASED DEVICES.

2. INSTALLATION STEPS FOR MAC BASED DEVICES.

[This page is intentionally left blank at the bottom]

Pg. 2 [Company Confidential- Pearson VUE] Version 2.1\_280322

#### FOR WINDOWS DEVICES:

#### SECURE BROWSER DOWNLOAD & INSTALL OPTIONS:

#### 1. Click on the link below to download the Secure Browser :

https://pearsonvueproctoring.s3.ap-south-1.amazonaws.com/ssb/javasb/win/ESSecureBrowser.zip This action should be performed preferably well before the exam to ensure your system is ready for exam delivery.

Secure browser download is an executable (.exe) file that will get downloaded to your default download directory of your system. To install this application, open the location where the file was saved on the system, and try to install the application from the installer program.

Please remember that you should have Administrator level permissions or rights of your personal laptop to enable a successful installation.

### **Browsers Supported**

Operating System	System Browser supported	
Windows 8, 8.1 and 10, 11	Google Chrome	Firefox

ES Secure Browser (lockdown browser) allows a student to take an exam in a secure environment. Follow the steps below to install the Secure Browser for Windows Operating System:

a. Double-click on the EXE installation file to view Setup wizard as displayed below.

NOTE: In the case of Windows 10/11 OS, the below screen is displayed. Click on Run anyway.

Pg. 3 [Company Confidential- Pearson VUE] Version 2.1\_280322

## b. Click "Install'

e. Secure browser will show progress to launch

f. You will be presented with demo screen with below message

## Lockdown Browser Launched Successfully

While the installer installs the secured browser, there may be some preliminary checks that a candidate's testing workstation must meet. Should there be any gaps technologically, the platform will auto-detect and candidate need to allow those software to install.

Detailed technical requirements are already shared on the appointment confirmation email previously.

[Installation of Secure Browser is a mandatory step and cannot be skipped].

Pg. 5 [Company Confidential- Pearson VUE] Version 2.1\_280322

#### 2. CAMERA & POP-UP BLOCKER ENABLEMENT:

A candidate will be asked to allow the camera device settings of the browser to allow capturing your photograph. The pop-up window will prompt candidate to change the settings of the browser to ensure it captures the live feed appropriately. For more detailed information, please refer to the set of instruction given to you below:

#### Change a site's camera & microphone permissions

- a) Open Chrome.
- b) At the top right, click More <sup>‡</sup> and then Settings.
- c) Under "Privacy and Security," click Site settings.
- d) Click Camera or Microphone.
- e) Turn the toggle switch for 'Ask before accessing (recommended)' to ON.

Settings	Privacy and security

Pg. 6 [Company Confidential- Pearson VUE] Version 2.1\_280322

#### Turn pop-ups ON

- a) Open Chrome.
- b) At the top right, click More and then Settings.
- c) Under "Privacy and security," click Site settings.
- d) Click Pop-ups and redirects.
- e) At the top, turn the setting to Allowed

NOTE: Please ensure the pop-ups are allowed on your browser settings before you proceed.

#### 3. HOW TO LOGIN & START EXAM ON THE ONLINE ASSESSMENT PORTAL

Please click on the link provided in the appointment confirmation email.

You will be able to find the below screen where a login name & password provided to you on an email needs to be entered. In case you have not received this email till, please inform your respective examination governing body about it immediately.

Login name	Password	LOGIN

- a. Enter your login name & password as provided and click on 'Login'.
- b. The next screen will show your scheduled exam information and the current status. The status will reflect As 'You have not registered and not attempted. You should now click on 'Start Test' button.

Warning! Pop-up blocker en	abled. You will need to disable pop-up blocker before you can launch your exam below. Go to pop-up blocker settings to enable pop-up.	Sort 🗸

	Start Test

d. Once you click on 'Start Test' button of the pop-up dialog box, you may see a pop-up blocker message with two icons as shown below.

Pg. 8 [Company Confidential- Pearson VUE] Version 2.1\_280322

e. A candidate will be asked to allow the camera device settings of the browser to allow capturing your photograph. Once the settings have been set, you will see your live picture shown on the same window.

Candidate will have to click on 'Capture' button, and it will prompt for another pop-up which will ask for confirmation of the captured picture. If a candidate is not satisfied with the photo, candidate may repeat the steps again. Once candidate has clicked on confirm, the admission process submits on its own.

#### Note:

- Candidate must close this capture window to proceed with the test to avoid issues during the test. This window is also known as 'Headshot' window.
- 2. Camera settings will be prompted for most of the cases and it must be allowed to proceed further.
- f. Once you have completed the admission steps, the status should change from "You have not registered and not attempted" to You have registered and not attempted.

To re-install or install the secure browser again, please follow the same document from Step 1.

Pearson VUE support details must have been shared with you over the appointment confirmation email, so for any technical issues please feel free to connect to us for assistance.

#### FOR MAC DEVICES:

#### SECURE BROWSER DOWNLOAD & INSTALL OPTIONS:

#### 1. Click on the link below to download the Secure Browser :

https://pearsonvueproctoring.s3.ap-south-1.amazonaws.com/ssb/javasb/mac/ESSecureBrowser.zip

This action should be performed preferably well before the exam to ensure your system is ready for exam delivery.

Secure browser download is an executable (.dmg) file that will get downloaded to your default download directory of your system. To install this application, open the location where the file was saved on the system, and try to install the application from the installer program.

Please remember that you should have Administrator level permissions or rights of your personal laptop to enable a successful installation.

#### Prerequisite:

OS specified minimum RAM of 4GB or more.

#### **Browsers Supported**

Operating System	Brow	ser supported	
Mac OS ver. 10.12 / 10.13 / 10.14 / 10.15 / 11.1 / 11.2 / 11.3 / 11.4 / 11.5 / 11.6 (Beta versions are not supported)	Google Chrome	Firefox	Safari

ES Secure Browser (lockdown browser) allows a student to take an exam in a secure environment. Follow the steps below to install the Secure Browser for MAC Operating System:

- 1: Extract the file ("ESSecureBrowser.zip") downloaded
- 2: Double click the installable package (".dmg file") extracted

Open ESSecureBrowse	er?	
A website wants to ope	n this applica	tion.

7. Click on cancel in next pop up

Your Mac machine may or mostly will block the installation of the ES Secure Browser. This is because, ES Secure Browser needs access to critical system resources like camera, taskbar, microphone, privilege to block already installed applications like Facetime, Skype, MS Teams, Screen sharing apps etc. and also since the software vendor is continuously releasing newer versions, which at the time of your usage, might not have approved and signed by Apple.

The message that you will get, if your security settings is set strong, to block unidentified source will be The ".dmg" can't be opened because it is from unidentified developer". OR "".dmg" can't be opened because the developer cannot be verified". Click on Cancel.

Follow the below steps to resolve this operational issue:

Likewise, Mac is very strict rules set on camera access as well. Following the step 4, after adding the application into security exception, will enable ESSecureBrowser to access the camera, during the exam.

Step 1: To change the system preference to add exception for ES Secure Browser, click the Apple menu OR

click on the System Preferences icon

in the Dock. And click on the Security & Privacy

**Step 3:** Click **Open** if you were prompted as given below, through a popup. Once done, you are now good to start the exam

0	<u> </u>

Now run the essb:// isdemo command again in web browser. Secure browser will start launching-

Once loaded fully secure browser will launch and show the below message-

Lockdown Browser Launched Successfully

**Step 4:** After the successful launch of Secure Browser in demo mode, click on the top right corner close button. On your close, you will see a popup requesting the camera access, as seen below. Click OK in here. This now makes you ready for the exam.

All the best for your online assessment!
